

720

A technical drawing of an L-shaped metal bracket. The vertical leg is on the left, and the horizontal leg is at the bottom. Both legs have rounded ends. There are three circular mounting holes: one at the top of the vertical leg, one on the left side of the vertical leg, and one at the end of the horizontal leg. Dimension lines indicate a height of 720 for the vertical leg and a width of 500 for the horizontal leg.
